PROJECTS

REACTBITES | Front End Developer
Link: ReactBites
- TECH: React
- Created a user-friendly interface with React: Reactbites for a seamless food ordering experience.
- Expanded payment options to include secure UPI and net banking, ensuring convenient and efficient transactions.
- Click on the link to enjoy the enhanced food ordering experience!

EXPENSE HANDLER | Front End Developer
Link: Expense-Handler
- TECH: React, HTML, CSS, JavaScript
- The primary purpose of this application is to help users manage their expenses efficiently. Users can easily add their expenses, including a title, amount, and date. The application provides a user-friendly interface to input and manage financial data.
- Expenses are displayed in a dynamic CSS bar chart, visually adjusting based on monthly proportions relative to the annual total expenditure.

INVESTMENT CALCULATOR
Link: Investment-Calculator
- TECH: React
- Built an Investment Calculator with React, prioritizing accuracy and user experience for informed investment decisions.
- Showcases technical prowess, emphasizing UX and aesthetics— a valuable portfolio addition.
